AMPEX Grand Master™

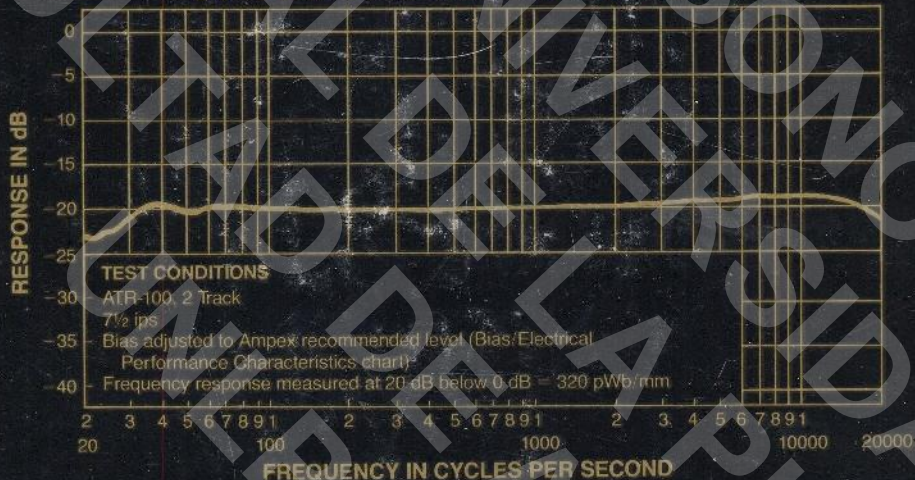

Ampeg Magnetic Tape Division has introduced Grand Master™ open reel mastering tape for the discriminating home recording enthusiast who demands the exact same tape used in professional recording studios. This reel of Grand Master open reel recording tape is the finest tape available ... anywhere.

Grand Master tape represents the state of the art in professional studio recording. The top engineering experts in the field insist on tape that faithfully captures every sound in the audible range with a minimum of distortion and background noise. After exhaustive research, Ampeg has developed a unique oxide particle formulation and special binder system, resulting in a tape having increased output sensitivity and improved saturation capability. This means more undistorted output—the ultimate studio mastering tape. We call it "Grand Master" ... the very finest open reel recording tape available ... anywhere.

WHY YOU SHOULD INSIST ON AMPEX

In professional recording studios around the world, album after album is recorded on Ampeg mastering tape and on sophisticated Ampeg studio recorders using Grand Master. In fact, Ampeg gave birth to the studio tape recording industry with the introduction of the world's first professional studio recorder in 1947. Ampeg developed professional television video recorders, instant replay, and the highly sophisticated instrumentation recorder for the space program. Today, Ampeg remains the leading name in the tape industry, and is highly regarded as the largest and most innovative manufacturer of professional recording equipment and tape.
